DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims 1 and 2 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear what structure Applicant is claiming with "a self-sustaining center-anchor formed on the center of the transmission lines..." How is a self-sustaining center-anchor formed on the center of two separate transmission lines? Is the anchor formed on one of the transmission lines, located in a position centered between the two transmission lines or on the substrate centered between the transmission lines. For examination purposes, this will be interpreted as *a self-sustaining center-anchor formed on a center line between the two transmission lines.*

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 2832

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Hopcroft [US 6,621,387].

Claim 1, Hopcroft discloses a self-sustaining center-anchor Mem switch comprising: transmission lines [110] formed on a substrate [102] at a predetermined gap [116] and having an input portion and an output portion; ground lines [112] formed at both sides of the transmission lines; a dielectric-moving plate [106, mechanical component 106 can be made of various dielectrics, col. 3 lines 64-67] formed over the substrate and including a switching unit [410] that electrically connects the transmission line during short-circuit operation; anchors [figure 1] having a self-sustaining center-anchor formed on the center line of the transmission lines to support the dielectric-moving plate to the substrate; and upper electrodes [406, 408] located in an upper portion of the dielectric-moving plate different than where the switching unit is located [figure 4] and serving as a driving electrode to the ground line, wherein the switching unit is operated by a bending of the dielectric-moving plate generated by a voltage difference applied to the upper electrode and the ground line, and switches the transmission lines.

Allowable Subject Matter

Claims 2-5 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
